The Renaud Air story begins with the plight of one parent trying to take care of his family. When the son of Iannique Renaud, the founder from Canada, was still an infant, he suffered from a respiratory condition doctors were at a loss to treat. After much research and worry for his child, Iannique finally provided his son with relief after investing in a set of air purifiers for his home. He then spent the next years studying the air purifier market and finally, he established the brand Renaud Air in hopes to help other victims of air pollution.

Since 2008, Renaud Air has been helping people live free from the dangers of indoor pollutants, contaminants and allergens,

serving both residential and corporate clients in Beijing, Shanghai and Hong Kong. By 2018, Renaud Air has become a member of the LBS Group – a leading professional hygiene services provider with over 20 years of experience in China. With the abundant resources of LBS Group, Renaud Air aims to bring higher quality products and services.

Renaud Air offers air purifier rental services (with filter replacement and maintenance every six months), filters for Blueair and Alen, masks and air quality monitors.

Von NG | Regional Director (China)
Head Instructor

Since 2010, Krav Maga Global (KMG) has been the primary name for practical self-defense and combat training in China.

Originally developed for the Israeli Defense Forces, Krav Maga is easy to learn and practical for street situations. Based on simple principles and instinctive movements, the system is designed to be suitable for everyone, regardless of age, size or strength.

In KMG classes, students learn how to defend against common attacks, including chokes, grabs, and bearhugs, weapon threats and multiple attacker situations. Just as important, we teach people situational awareness, danger prevention, and how to function under the stress and shock of a sudden, violent encounter.

Over the past years, the KMG Beijing team has provided effective self-defense training for adults and kids, short courses on women's self-defense, specialized training for protecting VIPs or loved ones, after-school programs for International Schools, corporate workshops and team building activities.

Tested on the battlefield and in the streets, Krav Maga is used by everyday people—men and women, young and old—to avoid danger and keep themselves and their loved ones safe.

Zhuf Fangfei | Founder & Chief Designer

Her history began in Shanghai, trained by the best tailors for 10 years and working professionally for more than 20, Feifei settled in Beijing in 1987 and kept on working in the field of garment. On June 1993 Feifei Tailor shop was officially founded in Beijing with a set of simple, uncompromising principles.

She places **customer satisfaction before anything else**. For her, the priority is not the profit margin but to gain the customer's trust and to satisfy their needs. "I try to look at it from my customers' perspective," she says. "If I were a businessman from Germany

and I travelled all the way to Beijing to get a suit tailored, I would want the best."

As far as her work is concerned, she follows the patterns and processes of a traditional Chinese tailor shop: **tailor clothing made by hand for customers**. She would never brag that she can make all customers immediately satisfied with her customization work, however she takes every detail seriously from the inside out for each piece of clothing, focusing on quality and the final appearance. She does not outsource any of her services.

WOVEN TALES has been founded by Annika, Ahmad and Siavosh Zabeti in 2012. Dedicated to the discovery and creation of unique handmade Persian carpets, it was voted "Best carpet brand" by ELLE Decoration magazine in 2016.

Ahmad's relationship to carpets has deep emotional roots: He is from the third generation of a family of carpet dealers. His grandfather started exporting the first unique pieces outside Iran's borders in 1938. When he was just a young boy, Ahmad and his father used to visit carpet weavers in Iran. His passion was born and he then never stopped working on enhancing this heritage.

Siavosh (creative director at Apple Inc. San Francisco since 2014) and Annika (textile designer) have taken over the artistic direction of the contemporary collection of WOVEN TALES, combining a pure modern style with ancestral Iranian know-how.

Interior design enthusiasts, Annika and Ahmad study the taste and expectations of their customers in order to accompany them in their choice and create an atmosphere with a unique touch in their home.
